TRENDING PAGE

On the trading page, the people a user follow will appear first.

Celebrities will be ranked according to the amount of money the app makes with them. If the app makes €500 with a celebrity and €100 with another, the celebrity with who the app makes €500 will appear before the other one on the Trending Page.

The order in which the celebrities will appear will be refreshed every minute. The celebrity with who the app makes €500 will count as €100 per minute (€100 per minute x5 minutes = €500.) and the celebrity with who the app makes €100 will count as €20 per minute.

Or maybe at launch they will just be ranked according to their number of followers if it's faster to do.

SEARCH PAGE

The search page is similar to the Trending Page.

A user will be able to search a celebrity simply with their username.

There will be 2 tabs as shown below, one “Following” and one “Suggested”.

In the “Following” tab, every celebrity a user follows will appear and be ranked according to their number of followers. The celebrities with the most followers will appear first.

In the “Suggested” tab, every celebrity will be ranked according to their number of followers just like in a the “Following” tab.

As the user scrolls down the screen, he will see a bunch of celebrities (like the first time you use the YouTube music app).

To be removed, there
shouldn't be anything
above the search bar,
like Instagram

Balance

Current balance: \$7,564 (only celebrities will have a balance)

A basic user might have a balance in some rare cases. Eg, he paid to FaceTime a celebrity but the latter was unavailable for some reason. In this case, the user's bid will go to his balance. He might use his balance to bid again or email the support to ask for a refund.

CREATE A CELEBRITY ACCOUNT

Celebrities will not be able to create an account by themselves. They will have to email our support and we will make an account for them.

NO

When on their own profile, a celebrity will first see this page first and if they tap on the green “+” button, they will see the facetime camera icon along with the withdrawal icon as shown in the previous page.

The “+” button will then turn into a “Done” button and this page will re-appear if the celebrity taps on the “Done” button.

In “Recent”, a celebrity will see all his previous video calls like Periscope and will just have to swipe left to remove a FaceTime from their profile the same way they can cancel a facetime session. A basic user will also see a celebrity’s recent video calls the same way as in Periscope, I didn’t have enough space in the basic user’s page to put this “Upcoming / Recent” tab but it will be there as well.
